

ABE Staff Online

LMS Options

These tools are user-friendly for programs who have minimal time to manage an LMS and need to share with staff or volunteers who don't have extensive experience using LMS online courses.

Schoology: <https://www.schoology.com/home.php>

You can log in to our course on schoology to see some examples of a course we have been working on.

Keep In Mind

1. Review your current use of technology- do you have the capacity to support using an LMS in your program
2. Do you have financial, social and organizational support for using an LMS to provide training?
3. How will you deliver the training to those expected to participate. When is the appropriate time for engaging staff and volunteers in training how to use the system?
4. Who will be assigned to manage the LMS? Do NOT underestimate the time to create and manage the LMS if you want to use it effectively. There should be one person or a team dedicated to managing and maintaining the LMS.
